github.com/ByCulichi · linkedin.com/in/culichi

Entry-level cybersecurity candidate with educational LetsDefend investigations, documented playbooks and ongoing Linux training. Python reporting projects and AWS Cloud Practitioner preparation complement the SOC Tier 1 learning path.

Practical portfolio — educational labs

- LetsDefend: documented VPN authentication, RDP brute-force and phishing investigations.
- Evidence correlation, suspicious-email indicators, investigation timelines, conclusions and reusable incident-response playbooks.

Technical foundations

- Alert triage, authentication logs, Windows events, RDP, VPN and incident documentation in educational exercises.
- Networking and TCP/IP fundamentals; Linux command-line and hardening learning path.
- Culichi-Metrics: Python automation for Excel reports; Git/GitHub version control and technical documentation.

Current training

- Linux diploma program — in progress.
- AWS Cloud Practitioner — exam preparation in progress.

Transferable experience

- 7 years of bilingual service and support; TCS operations supervision, SLA follow-up and incident escalation.
- TTEC: Tier 2 mobile support, root-cause analysis and technical training. Bilingual English/Spanish.

Languages: English / Spanish — bilingual customer service experience
