Electrical training in residential and industrial topics, with documented course practice and residential client maintenance work.

DOCUMENTED PRACTICAL WORK

- Residential installation practice board and float-switch course exercise.
- Residential client work: outlet and switch replacement and replacement of two ceiling luminaires.
- Photographic evidence and technical explanations available in the electrical portfolio.

TRAINING

- LinkedIn Learning: Electrical Systems: Reading Drawings and Schematics — completed.
- RED CONOCER electrical training — in progress.
- Udemy: Basic Electrical Installations — in progress.
- Udemy: Electrical Measurements — in progress (AC/DC voltage, clamp current, resistance and de-energized continuity).

APPLIED KNOWLEDGE IN TRAINING

- Electrical drawings and symbols; Ohm’s/Kirchhoff’s laws, circuit analysis, cable selection, residential loads and installation standards.
- AC/DC voltage, clamp current, resistance, de-energized continuity, protective devices and multimeter safety ratings.
- Industrial training: three-phase systems, motor starting/protection, control/power circuits, contactors and introductory VFDs.
- Fault diagnosis, maintenance planning, project calculations and photovoltaic/energy-efficiency foundations. START/STOP contactor practice remains planned.

TRANSFERABLE EXPERIENCE

- TCS: operations supervision, SLA follow-up and incident escalation.
- TTEC: Tier 2 mobile support, root-cause analysis and technical training. Bilingual English/Spanish.

Languages: English / Spanish — bilingual customer service experience
