Bilingual professional with 7 years in customer service, technical support, training and operations. I build web interfaces and automate reports, document educational cybersecurity investigations, and develop practical electrical, electronics and smartphone-repair skills.

Professional experience

- TCS — Operations Supervisor | Oct 2025–present. Daily operations, SLA compliance, incident response times, escalation protocols, quality metrics and time management.
- TCS — Technical Support Analyst (Energy Operations) | Nov 2023–Oct 2025. Monitored network, service-outage and system-impact queues; billing services and telecommunications billing.
- Alorica — Logistics Operations Analyst | Dec 2022–Aug 2023. Coordinated business-critical deliveries using internal ticketing and tracking systems.
- TTEC — Training Technician / Tier 2 Technical Support | Apr 2019–Oct 2022. Mobile-device support, root-cause analysis of hardware/software incidents and technical training.
- TP — Customer Support & Sales Representative | Aug 2017–May 2018. Bilingual customer and billing support in high-volume environments; new-hire and sales training.

Professional strengths

- Operations supervision, SLA follow-up, incident escalation, quality metrics and time management.
- Tier 2 troubleshooting, root-cause analysis, technical training, ticketing and logistics coordination.
- English/Spanish communication, user guidance, conflict resolution and technical documentation.

Technical profile

- Software development · cybersecurity learning · electrical maintenance · electronics · smartphone repair. Projects, original work photographs and training details: culichi.lat.

Languages: English / Spanish — bilingual customer service experience

MULTIDISCIPLINARY

Christian Armando Velasco Estrada

Bilingual Technical Professional | Development, Support & Operations

Software & automation

- Nine public projects: culichi.lat, Mirror, RonnysPage, Calculator-Culichi, Todo-Culichi, WeatherApp-Culichi, Journey_blog, Portfolio-Culichi and Culichi-Metrics.
- React, Next.js, TypeScript, JavaScript, HTML/CSS and Tailwind; Git/GitHub and Vercel. Culichi-Metrics uses Python, pandas and XlsxWriter to generate Excel KPI reports and charts.

Cybersecurity — educational practice

- Three LetsDefend investigations: VPN authentication, RDP brute force and phishing; log analysis, evidence correlation, investigation steps and response playbooks.
- Linux diploma in progress. AWS Cloud Practitioner exam preparation; credential not yet obtained. Seeking a first SOC Tier 1 opportunity.

Electrical maintenance & electronics

- Residential outlet/switch replacements and two ceiling luminaires; confirmed polarity/earth checks and photographed measurements. Course practice: installation board and float-switch control.
- AC/DC measurement, drawings and circuit diagnosis in training. Component validation, oscilloscope, power supply, metrology and soldering foundations. Industrial/control studies ongoing; START/STOP practice planned.

Smartphone repair

- iPhone 12 Pro and 14 Pro battery replacements; iPhone XR screen replacement. Final function checks confirmed; case-specific original photos at culichi.lat/repair.
- LIDETEC course practice: intake, disassembly, multimeter diagnosis, board care, soldering/hot air and connectors.

Education & training status

- Academlo: incomplete frontend, backend and full-stack studies.
- Escuela Tecnológica de Occidente: Basic Electronics in progress; expected finish in February. Six advanced electronics tracks remain planned.
- Universidad Internacional / RED CONOCER electrical training and Udemy installations/measurements courses: in progress.
- LinkedIn Learning — Electrical Systems: Reading Drawings and Schematics: completed; document pending upload.
- LIDETEC / Liceo de Tecnología: smartphone repair course participation certificate, 1 August 2026.
